

HOSE REEL AND EXTENSION ARM

HOSR

HOSR - This hose reel is a user-friendly and ergonomic product that provides a more efficient cleaning time, as it is always close to hand and fast-started.

In addition to being extremely quiet, the construction keeps the hose clean and whole longer, since it rarely, or never, needs to be in contact with the floor. Connection to pipe system is Ø50.

The antistatic hose has a value of $10^4 \Omega/m$ and can be used in ATEX zones 21 and 22. Ceiling mounting available. The mounting option must be specified when ordering, since a hose reel that is prepared for another mounting can not be modified.

Adjustable hose stopper
Easy to adjust the length of the hose.

Antistatic hose
Prevents electrical charge ($10^4 \Omega/m$).

Retractable antistatic hose
Returns automatically to its initial position when the hose is released, which reduces and streamlines the cleaning process.

Arm
The connection between the hose and the shutter valve.

Rotating bracket
Gives the hose reel greater scope and higher flexibility.

Micro switch
Pulling the hose is all that is needed to activate the vacuum cleaner.

Hinge and locking pin
For easy installation of hose reel.

Shutter valve
Connected to the arm and controls the exhaust start and stop.
